1339 Quite Interesting Facts To

Here are some facts about London's Tower Bridge. Tower Bridge was built between 1886 and 1894. It spans the River Thames, connecting the London boroughs of Tower Hamlets (north side) and Southwark (south side). The bridge combines elements of a suspension bridge design with elements of a bascule bridge design. It has two towers linked [...]

Greg Murphy - you actually made the author's point. The point of the article is not the value or quality of the items we purchase today. The point is that the cost of those items has gone up dramatically (and often for good reasons you mention such as improved safety, increased amenities, higher quality, etc.)...but the income we earn has not kept pace with the increased costs.

Comparing the inflated cost of living today from 1950 to ...

I once told my son that there was a scientist for every thing. So we started a tradition where he'd pick something to see if there were people that studied it, and I'd give some age-appropriate examples of what they do.

Trajan was most conspicuous for his justice, for his bravery, and for the simplicity of his habits. He was strong in body, being in his forty-second year when he began to rule, so that in every enterprise he toiled almost as much as the others; and his mental powers were at their highest, so that he had neither the recklessness of youth nor the sluggishness of old age.

Saint-Cergue is located at 1041 m at the entrance to the Col de la Givrine, to the east of the impressive Jura peak of La Dôle. Its situation, high above Lake Geneva, offers wonderful wide views of the whole alpine chain as far as Mont Blanc. The main attractions of this resort are the peaceful landscape of the Jura and the fresh, scented air of the extensive forests.

GEOMAGNETIC UNREST: A stream of solar wind flowing from a hole in the sun's atmosphere is expected to hit Earth's magnetic field on May 21st. The gentle impact could cause geomagnetic unrest around the poles and perhaps even a minor G1-class geomagnetic storm. Unfortunately, glare from the waning full Moon will interfere with the visibility of high-latitude auroras.
