A molecular formula is a representation of a molecule that uses chemical symbols to indicate the types of atoms followed by subscripts to show the number of atoms of each type in the molecule. (A subscript is used only when more than one atom of a given type is present.) Molecular formulas are also used as abbreviations for the names of compounds.

There are a lot of great study books available for the AFOQT and most of them are relatively inexpensive. Many of these books contain multiple practice tests. Timing yourself while taking these practice tests is a great way to prepare for the pressure of taking the real thing. As mentioned before, older study books are still very useful if you make sure not to bother studying

5. Be aware of the free-response booklet instructions. It's helpful to know the actual AP Bio FRQ exam instructions: • Each answer should be written out in paragraph form; outline form is not acceptable. • Do not restate questions or provide more than the number of examples called for. • Diagrams alone will not receive credit, unless called for in the question.
