I work for a tech company in Silicon Beach, CA and one of my jobs as a UI Engineer is to conduct technical interviews for incoming web UI Developer / UI Engineer candidates. This has placed me in the unique position of seeing what a company might be looking for in a candidate, and what questions they might ask to judge if the candidate might be a good fit.

Git and GitHub. If you're serious about software development, you need to learn about Git. Git is a version control system, a tool that tracks changes to your code and shares those changes with others. Git is most useful when combined with GitHub, a website that allows you to share your code with the world, solicit improvements via pull requests and track issues.
