The scale-up of size of dislocation-free silicon crystals from the 1950s to today is a key enabler of "Moore's law," which predicted that the cost of transistors would decrease and the number of transistors per device would increase at a regular pace. The increase of wafer size and improvement of wafer physical quality contributed greatly to this trend, as did the complementary decrease of ...

Damascus College is Ballarat's only Catholic co-educational secondary college. It was established after three separate Catholic colleges, St Martin's in the Pines, Sacred Heart College and St Paul's College amalgamated. The college is located on a treed 20 hectare campus in Mount Clear, 7 km from Ballarat's central business district. Damascus College is a day school for secondary students in ...

Compared to other materials, aluminum production is an energy-intensive industry (Abdulkadir et al., 2015) that shows the greatest difference in energy between primary and secondary production (about 174–186 MJ/kg for primary production, compared to 10–20 MJ/kg for secondary production) (Green, 2007). The reason for the much less energy consumed by the secondary Al production is that its ...

An alloy is a combination of metals and of a metal or another element. Alloys are defined by a metallic bonding character. An alloy may be a solid solution of metal elements (a single phase) or a mixture of metallic phases (two or more solutions). Intermetallic compounds are alloys with a defined stoichiometry and crystal structure. Zintl phases are also sometimes considered alloys depending on ...
