The mathematics of general relativity are complex. In Newton's theories of motion, an object's length and the rate at which time passes remain constant while the object accelerates, meaning that many problems in Newtonian mechanics may be solved by algebra alone. In relativity, however, an object's length and the rate at which time passes both change appreciably as the object's speed ...

Albert Einstein (1879–1955) was a renowned theoretical physicist of the 20th century, best known for his theories of special relativity and general relativity. He also made important contributions to statistical mechanics, especially his treatment of Brownian motion, his resolution of the paradox of specific heats, and his connection of fluctuations and dissipation.

A partial differential equation (or briefly a PDE) is a mathematical equation that involves two or more independent variables, an unknown function (dependent on those variables), and partial derivatives of the unknown function with respect to the independent variables. The order of a partial differential equation is the order of the highest derivative involved.

Note added October 2005: In creating this page I have been helped much by the journal papers, and web resources of John Bachall. John passed away in August, 2005. At least for the time being, his webpage at the Institute for Advanced Study in Princeton, remains active, and I will keep those links here as long as I can.

Les équations de Maxwell, aussi appelées équations de Maxwell-Lorentz, sont des lois fondamentales de la physique. Elles constituent les postulats de base de l'électromagnétisme, avec l'expression de la force électromagnétique de Lorentz. Ces équations traduisent sous forme locale différents théorèmes (Gauss, Ampère, Faraday) qui régissaient l'électromagnétisme avant que Maxwell ...

Albert Einstein was born in Ulm, in the Kingdom of Württemberg in the German Empire, on 14 March 1879. His parents were Hermann Einstein, a salesman and engineer, and Pauline Koch. In 1880, the family moved to Munich, where Einstein's father and his uncle Jakob founded Elektrotechnische Fabrik J. Einstein & Cie, a company that manufactured electrical equipment based on direct current.

La electricidad (del griego ἤλεκτρον *élektron*, cuyo significado es 'ámbar') [1] es el conjunto de fenómenos físicos relacionados con la presencia y flujo de cargas eléctricas. Se manifiesta en una

gran variedad de fenómenos como los rayos, la electricidad estática, la inducción electromagnética o el flujo de corriente eléctrica.
