SMART is a mnemonic/acronym, giving criteria to guide in the setting of objectives, for example in project management, employee-performance management and personal development. The letters S and M generally mean specific and measurable. Possibly the most common version has the remaining letters referring to achievable (or attainable), relevant, and time-bound.

Guidelines. Guidelines (also known as clinical practice guidelines, practice guidelines, and CPG's) are high-level evidence because a group of experts has reviewed the existing evidence on a topic, graded the evidence, and made recommendations for how to implement the evidence in a clinical setting. Guidelines can be developed on the international, national, state, and local level by health ...
